

Dear Physics Major:

This map is a term -by-term sample course schedule. The milestones listed below each year are designed to keep you on course to graduate in four years. A sample schedule is provided as a general guideline to help you build a schedule each term. Your courses must be selected to satisfy all core curriculum and state, lab science, and multicultural requirements. Refer to the Undergraduate Catalog for the most current curriculum.

FYSE(3 hr) can substitute for 3 hours of PERS. The 4<sup>th</sup> hour of PERS is waived (a student does not have to take any PERS courses), but because USG requires 120 hours to earn a bachelor's degree, that 1

entering during the fall of an even -numbered year, the curricula for years three and four would be interchanged. Also, students may choose to take one or three laboratory courses in upper -level. See VSU catalog for details.
